# Phospho-IRS-1 (Ser318) Rabbit Polyclonal Antibody

Catalog #: EAB14583

| Host/Isotype | Clonality  | Applications | MW (kDa) | Reactivity   |
|--------------|------------|--------------|----------|--------------|
| Rabbit IgG   | Polyclonal | WB, IHC-P    | 132      | Human, Mouse |

## **Applications Dilutions**

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

**WB**(Western Blotting) 1:500-2000 **IHC-P**(Immunohistochemistry-Paraffin) 1:50-300

#### **Product Information**

Conjugate Unconjugate

Specificity

Phospho-IRS-1 (Ser318) Rabbit Polyclonal Antibody detects endogenous levels of IRS-1 only

when phosphorylated at Ser318.

**Purification** Affinity purification

Concentration1mg/mlFormatLiquid

Formulation In PBS, pH 7.4, Containing 0.02% sodium azide, 0.5% BSA and 50% Glycerol

Shipping Gel Pack

Storage Storag

Aliquots may be stored at +4°C for 1-2 weeks

 UniProt ID
 P35568

 Entrez-Gene ID
 3667

## **Product Description**

IRS-1 is one of the major substrates of the insulin receptor kinase. IRS-1 contains multiple tyrosine phosphorylation motifs that serve as docking sites for SH2-domain containing proteins that mediate the metabolic and growth-promoting functions of insulin. IRS-1 also contains over 30 potential serine/threonine phosphorylation sites. Ser307 of IRS-1 is phosphorylated by JNK and IKK while Ser789 is phosphorylated by SIK-2, a member of the AMPK family. The PKC and mTOR pathways mediate phosphorylation of IRS-1 at Ser612 and Ser636/639, respectively. Phosphorylation of IRS-1 at Ser1101 is mediated by PKC0 and results in an inhibition of insulin signaling in the cell, suggesting a potential mechanism for insulin resistance in some models of obesity.
